DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

CROPS	PEST	RATE	USE RECOMMENDATIONS
Legume Vegetables including Snap Bean Fruiting Vegetables, including Pepper and Tomato Strawberry	Thrips	Apply MBI-203 EP Bioinsecticide at a rate of 4 – 12 quarts per acre.	Apply MBI-203 EP Bioinsecticide in ground and aerial equipment with quantities of water sufficient to provide thorough coverage of infested plant parts. The amount of water needed per acre will depend upon crop development, weather, application equipment, and local experience. For conventional air and ground applications, use at least 10 gallons of total volume per acre in water-based sprays.

All applicable directions, restrictions and precautions on the EPA-registered label are to be followed.

This FIFRA Section 2(ee) recommendation contains new or additional directions for use of this product, which may not appear on the package label. Read and carefully observe the cautionary statements plus all the other information appearing on the product label.

This recommendation must be in the possession of the user at the time of pesticide application.
