Marrone Organic Innovations Closes \$3.75 Million Series A Financing

DAVIS, Calif. (May 2, 2007) - Marrone Organic Innovations, Inc. (MOI) is pleased to announce that the company has raised \$3.75 million in an oversubscribed private round of financing. Clean Pacific Ventures of Mill Valley, CA led the deal. Other investors include One Earth Capital, Saffron Hill Ventures, Calvert Social Investment Fund, and Wavepoint Ventures. Also participating were leading members of California's agricultural industry as well as prominent local angel investors.

Sean Schickedanz of Clean Pacific and Joe Hudson of One Earth will join the Board of Directors.

"We are impressed by Pam Marrone's track record of building successful biopesticide companies, the experienced team she assembled, and the company's rapid progress with licensing products while launching its own R&D," said Sean Schickedanz, General Partner of Clean Pacific Ventures.

The new funds will enable MOI to expand business operations, develop its growing pipeline of natural pest management products, and continue efforts to license promising technology.

"We are thrilled to find investors that embrace our vision to be the world leader in natural product innovation and to make natural, effective, safe, and environmentally friendly products the mainstream future of pest management," said Dr. Pam Marrone, MOI's Founder and CEO.

Marrone Organic Innovations recently launched GreenMatch™ O, an effective, safe, and natural weed control product for organic farming. Weeds are the single largest cost of organic production, and a major hurdle for farmers who want to transition to organic methods. MOI's new product has the potential to significantly improve yields and reduce costs of organic production. MOI also has several other natural pest management products in development.

Continued...

Marrone Organic Innovations (MOI) discovers and develops effective natural products for weed, disease, and pest management. Through a combination of in-licensed technology and its own R&D, MOI develops products that target markets needing effective and environmentally responsible solutions. MOI's own R&D finds naturally occurring microorganisms from unique habitats and develops them into products for controlling insects, weeds, nematodes, and plant diseases.

Clean Pacific Ventures is a venture capital fund that invests in promising early stage clean technology companies. Clean Pacific focuses primarily on alternative energy, water and food purification, and advanced or renewable materials. Contact: Dave Herron, dave@cleanpacific.com or (415) 388-0123.
