GreenMatch™O Burndown Herbicide Receives OMRI Listing

DAVIS, Calif. (May 17, 2007) – Marrone Organic Innovations, Inc announces that the new herbicide, GreenMatch™O, is now listed by the Organic Materials Review Institute (OMRI). Registered by the EPA in August of 2006, the product received status for use in organic production under the National Organic Program, and is also a registered material in the Washington State Department of Agriculture's Organic Food Program.

Many organic operations will only use products that have passed the extensive review of OMRI. "This OMRI listing will give organic growers an additional measure of confidence when using GreenMatch O on their certified acreage," states Julie Versman, Vice President of Marketing at Marrone Organic Innovations.

The Organic Materials Review Institute (OMRI) provides organic certifiers, growers, manufacturers, and suppliers an independent review of products intended for use in certified organic production, handling, and processing.

GreenMatch O is a non-selective, post-emergent weed killer based on an extract of citrus. Extensive testing has shown it to outperform existing organic herbicide offerings and provide users with a viable alternative to costly flaming and hand hoeing.

The product is manufactured by Cutting Edge Formulations of Buford, GA, and is licensed to Marrone Organic Innovations for sale in the Western US, Canada and Latin America.

Registered for sale in OR, WA, ID, UT, NV, AZ and HI, GreenMatch O is distributed by Monterey Ag Resources. A label is pending in California. For more info, contact Marrone Organic Innovations at info@marroneorganics.com or Monterey AgResources at www.montereyagresources.com

Marrone Organic Innovations (MOI) discovers and develops effective natural products for weed, disease, and pest management. Through a combination of in-licensed technology and its own R&D, MOI develops products that target markets needing effective and environmentally responsible solutions. MOI's own R&D finds naturally occurring microorganisms from unique habitats and develops them into products for controlling insects, weeds, nematodes, and plant diseases.

Monterey AgResources began operations in 1963 as a manufacturer's representative for various nutrient and plant protection products. Concentrating mainly in the western United States, Monterey functions as a wholesale distributor and formulator of nutrients and pesticides to the agricultural, horticultural, lawn and garden and feed industries. The company is an innovator in the agrichemical industry, bringing new technologies and products to the ever changing marketplace. Monterey AgResources delivers value to its customers and suppliers through unparalleled customer service, product support, logistics, technical sale support and manufacturing capabilities.
